# Call for observers to the ESCO Member States Working Group

The Commission is calling for applications in order to appoint a number of observers who will participate in the works of the ESCO Member States Working Group. This call is addressed to organisations, candidate countries, EEA countries, or public entities other than Member States' authorities. Each observer shall nominate one expert as a representative to the group.

## QQI Ireland hosted an ESCO webinar for national stakeholders

On March 14th, QQI hosted a briefing webinar on ESCO (the European Skills/Competencies, Qualifications and Occupations Initiative). The aim of the webinar was to promote awareness of ESCO and learn more about its current and potential applications in the world of education and the world of work. Over forty invited practitioners and policymakers attended.

### New EU skills profile tool translated into Ukrainian

To help Ukrainian refugees fleeing Russia's invasion, the European Commission has published a Ukrainian version of the EU Skills Profile Tool for Third Country Nationals. The Tool helps them map their skills and find jobs and other opportunities. It also contributes to making skills and qualifications from Ukrainians more easily recognised across the EU.

# Intra-EU labour mobility annual report 2021

The report identifies trends in free movement of workers, based on the latest available data (2020/2019). This edition also includes findings on the impact of COVID-19 on mobility and on return mobility. In 2020 13.5 million Europeans lived in another EU country, out of which about 10 million of working age. The main EU country of destination for EU movers is Germany followed by Spain, Italy and France. Romania, Italy, Poland, Portugal, Croatia and Bulgaria were the most important countries of origin of mobile workers in general and active mobile workers in particular.

#### Apprenticeships for greener economies and societies

Chapter 3 in this publication discusses the labour market impacts of the green transition, where the authors make the case for a more granular understanding of the impact of the green transition on labour demand and supply at the level of industries, occupations and skills to inform the evidencebased design and targeting of green apprenticeships. Find out more about how ESCO is useful in this analysis.

**Global report: Technology adoption in public employment** services This report provides a global overview on how public employment services are approaching technology to improve service delivery, prior to the pandemic and when the COVID-19 crisis was in full swing. From better use of data to more effective service design and accessibility, the report explores the advantages offered by the utilization of long-tested as well as newly introduced technologies. It also analyses the barriers to the effective use of technology in service delivery.
