Consultation on ESCO v.1.2. consists of **997 concepts** divided into occupations and skills, clustered in the following tabs.

Step 1

The column "Type of change" specifies what kind of task has been developed in every concept. Please use the filters to prioritise the concepts you wish to give feedback on.

You will find **8 different tasks** performed for this new version:

Occupations	Knowledges & Skills
• New Occ • Skills set improvement • Obsolete-Deleted	• New KSC (Knowledges&Skills) • Orphan skills • Duplicates • Sign Language • Obsolete-Deleted

- Creation of **35 new occupations** and **231 Knowledges&Skills.**

- **Skills set improvement of 111 occupations**. Essential and/or optional skills were identified by looking at online job vacancies and linked to these occupations.

- **325 Orphan skills** were identified and corrected by linking them as essential and/or optional to occupations.

- Removal of **146 duplicate skills** and their corresponding information was merged with **137 retained skill concepts.**

- Inclusion of **national sign languages**.

- Deletion of **157 Obsolete** concepts.

Step 2

Once the concepts have been reviewed, use the columns **"Issues (I have concerns about...)"** and **"Proposed solutions"** to give feedback. Both are highlighted in blue. The issues to underline are limited to the following ones:

After selecting the issue, please, leave a brief comment with your suggested solution.

I have concerns about PT/NPTs
I have concerns about descriptions
I have concerns about skills and knowledges linked
I have concerns about occupations linked
I have concerns about the allocation in the hierarchy
I have concerns about the labour market representation
Typos
Others

Step 3

Save your comments and send the file to **EMPL-ESCO-SECRETARIAT@ec.europa.eu** with the email subject: **External Consultation Feedback – ESCO V1.2**

Public Consultation on ESCOv.1.2. will last **1 month.** Deadline for feedback submission is **6th October 2023**.

ESCO team will analyse your proposals and implement the suggested improvements prior to ESCO v1.2. release.
